SKILLS

Mobile Development

Flutter & Dart · Kotlin · Java · Swift (basic) · BLoC state management · modular architecture · dependency injection · in-app WebView · Android & iOS deployment

Cross-Platform & Rendering

Flutter Web/WASM · Kotlin Multiplatform (exploratory) · Skia/Impeller rendering pipeline

IoT & Embedded

Raspberry Pi · ESP32 · Firmata · diozero (Kotlin/JVM GPIO) · Arduino IDE

Tools & Practices

Agile/Scrum · sprint retrospective facilitation · Git · REST APIs · Python (ReportLab automation) · AI-assisted development (Claude Code, multi-model workflows)

Languages

Indonesian (native) · English (professional)

CERTIFICATIONS

Kotlin Android Developer Expert

Dicoding Academy — Oct 2018

Memulai Pemrograman Dengan Dart

Dicoding Academy — May 2021

Memulai Pemrograman Dengan Swift

Dicoding Academy — Jul 2022

Kemal Maulana

Project Manager · Mobile Engineer — Flutter · Android · IoT

PROFILE

Mobile engineer turned project manager with 8+ years of experience shipping production apps — native Android (Kotlin/Java) since 2018, Flutter since 2021. Currently leading multiple concurrent client projects in an agile/Scrum environment at Reacteev.id while maintaining a government Flutter product as Mobile Engineer. Background in IoT from university through personal projects, and an early adopter of AI-assisted development workflows.

WORK HISTORY

Project Manager

Reacteev.id · March 2025 to Present · Bandung

- Manage multiple concurrent client projects (CRM, finance, education, and retail domains) in an agile/Scrum environment, coordinating delivery across development teams.
- Facilitate sprint retrospectives across project teams, synthesizing feedback into actionable process improvements (tooling, daily progress cadence, pre-production reviews).
- Produce monthly executive reports covering RAG status, KPIs, and Progress/Plans/Problems summaries; built a Python/ReportLab pipeline to automate report generation.

Mobile Engineer — Tenaga Ahli Programmer

Dinas Komunikasi, Informatika & Statistik Kab. Bandung Barat · March 2021 to Present

- Develop and maintain a Flutter application serving citizens and civil servants, deployed to both Android and iOS.
- Build additional applications on request for government service needs.

Android Developer

PT. Kreasi Inovasi Digital (WorkLife&Beyond) · March 2020 to February 2021

- Built performance management, social media, and people-profile modules for a Human Capital Ecosystem application.

Freelance Android Developer

Self-employed · January 2019 to December 2020

- Delivered native Android projects for various clients alongside full-time roles.

Mobile Developer

PT. Kunci Transformasi Digital · August 2018 to March 2019

- Built a student monitoring application integrated with a parental notification system.

PROJECTS

- **Smart door lock (thesis, modernized):** IoT access control originally on Android Things/Kotlin (Raspberry Pi 3B); migrated to a Kotlin JVM + diozero stack with an ESP32 running ConfigurableFirmata.
- **Multi-model AI orchestration:** Claude Code workflows chaining models across planning, reasoning, and implementation stages for development tasks.

EDUCATION

Pasundan University — Bandung, West Java

Bachelor of Informatics Engineering, Mobile Development & Internet of Things · Class of 2015 · GPA 3.49
